**Position Statement of *Pactrol Controls Ltd*  
Concerning the EU WEEE 2 Directive  
2012/19/EU  
May 2016**

*Pactrol Controls Ltd* (a strategic business unit of Emerson Electric Co, St. Louis, Missouri) is aware of and supports the objectives of the European Union legislation regarding the marking of electrical and electronic equipment (EEE\*) and their registration with national authorities, as well as the financing, collection, treatment and recovery of waste electrical and electronic equipment (The new Directive 2012/19/EU of 4 July 2012 on waste electrical and electronic equipment (WEEE 2 Directive)).

In order to ensure that *Pactrol Controls Ltd* meets the requirements of the WEEE 2 Directive we have set up internal working groups that review:

- each individual product and assess if it falls under the scope of application of the WEEE 2 Directive
- if *Pactrol Controls Ltd* is a producer under the WEEE 2 Directive or has other contractual obligations on behalf of a producer
- if the product shall be classified B2B or B2C under WEEE standards in order to assess the specific obligations of the producer under WEEE 2.

The key aspects of *Pactrol Controls Ltd*'s implementation of WEEE 2 include the following as per the date of this position statement:

- *Pactrol Controls Ltd* does not produce, introduce, or distribute any electrical and electronic equipment (EEE) into the EU. Therefore *Pactrol Controls Ltd* does not have any obligation under WEEE 2.

We will closely monitor these issues and will continue to adapt our compliance strategy to the implementation of the directive into the local law of Member States, as it occurs.

Should you require any further information on WEEE 2 and how it may affect your transactions with *Pactrol Controls Ltd* please contact your usual contact in the first instance or email David Beeston (dave.beeston@emerson.com) who is the person responsible for WEEE within *Pactrol Controls Ltd*
